

Sponsorship Proposal Letter

Dear [Sponsor's Name or Title],

I hope this message finds you well.

My name is Nkosiyabo Mdladla, a passionate Computer Engineering student at Cape Peninsula University of Technology (CPUT). I am reaching out to request your support for a groundbreaking project I've been developing — AutoGuardian, an intelligent, locally-engineered anti-theft system for vehicles, designed with the South African context in mind.

What Is AutoGuardian?

AutoGuardian is a cost-effective, real-time vehicle security system that integrates:

- Embedded hardware (ESP32 + GPS + GSM modules)
- A cloud-based backend with real-time alerts and event logging
- A user-friendly cross-platform Flutter mobile app with live tracking, remote shutdown, and tamper alerts

In simpler terms: it's a smart car security companion that lets you track, protect, and control your vehicle from your phone, anytime, anywhere.

Why This Matters?

South Africa has one of the highest vehicle theft rates globally. Despite the presence of existing systems, many are either too expensive, lack real-time feedback, or are not integrated with mobile platforms. AutoGuardian addresses these pain points directly by:

- Using affordable, easily accessible components
- Allowing users to shut down their vehicle remotely
- Offering live GPS tracking and tamper alerts
- Enabling full control and visibility through a modern mobile app

Project Status

-  Hardware simulation phase complete
-  Backend server and cloud services developed and secured
-  Mobile application functioning with live GPS and alert capabilities
-  Remaining: Procurement of physical hardware for real-world testing and pilot deployment

Sponsorship Request

I am currently seeking a sponsor to help fund the first complete hardware prototype, estimated at R2,000. This would allow me to:

- Purchase the full set of electronic components (microcontroller, GPS, GSM, sensors, relay, casing)
- Install and test the system in a real vehicle
- Record and publish results for a live case study
- Strengthen my pitch to investors, tech incubators, and accelerators

Larger funding would help me produce multiple units to launch a small pilot program for private car owners or fleet managers.

Impact

Your support will not only help bring this vision to life — it will:

- Empower a local student innovator
- Contribute toward safer communities
- Support homegrown tech solving real-world problems
- Position your organization as a forward-thinking backer of innovation

Let's secure South Africa's roads — one smart car at a time.

I would love to meet or chat further at your convenience and present a demo of AutoGuardian.

Thank you for your time and consideration. I'm looking forward to the possibility of working together.

Warm regards,

Banele Mdladla
